

Sherif Fahmy Mohamed

Junior Flutter Developer

Mansoura, Egypt (Relocation Available)

LinkedIn: Sherif Fahmy_ | **Phone:** +20 1004093899 | **Email:** sfhmy7124@gmail.com

| **GitHub:** sheriffahmy74 | **Military Status:** Exempted

Profile

Junior Flutter Developer with strong hands-on experience building scalable applications using Flutter & Dart. Skilled in State Management, REST APIs, and Firebase. Graduated with Excellent Honors (Ranked 1st), with a solid academic foundation in Computer Science and Problem Solving.

Work Experience

Flutter developer

INETWORK Middle East

Hybrid | New Cairo «Cairo

- Engineering scalable and high-performance mobile solutions while contributing to system architecture using Clean Architecture and SOLID principles.
- Conducting comprehensive production-readiness and security audits to ensure full compliance with App Store and Play Store standards.

Education

Bachelor of Specific Education – Computer Science Department | Mansoura University (2021 – 2025)

- **Grade:** Excellent with Honors | **Class Rank:** 1st in Department.

Technical Skills

- **Frameworks & Logic:** Flutter, Dart, SOLID Principles, Clean Architecture (MVVM), Problem Solving.
- **State Management:** Bloc, Cubit.
- **Data & APIs:** REST APIs (Dio/Http), Firebase (Auth, Firestore, DB), SQLite, SharedPreferences.
- **AI Tools:** Prompt Engineering, AI-Assisted Dev (Cursor AI, GitHub Copilot).
- **General Tools:** Git, GitHub, Google Maps

Projects

- **Flutter Breaking:** A Clean Architecture app using Cubit & Dio for robust API and offline handling.
- **Nabdy – Healthcare Super-App (INETWORK):**

- Conducted a comprehensive technical audit to resolve critical iOS Privacy Manifest compliance issues and Google Maps SDK authorization conflicts, ensuring full App Store readiness.
- Optimized overall application performance and significantly reduced APK/AAB size through intelligent asset compression, dependency optimization, and efficient build configurations.
- Updated, refactored, and maintained project dependencies/packages to enhance application stability, compatibility, maintainability, and runtime performance.
- Prepared and configured Google Play Console and Apple Developer accounts for deployment, publishing workflows, and production release readiness.
- Contributed to improving code quality, scalability, and production reliability through architecture-focused enhancements and performance optimization practices.
- **E-Commerce App (NTI Graduation):** Full UI development and REST API integration.
- **Malaz App:** Role-based system using Firebase and Google Maps (*Built with AI support*).
- **Anti-Cheating Exam App:** Secure system with screenshot detection and Firebase backend.
- **Gym App:** Workout schedule generator with PDF output (*Built with AI support*).

Courses & Certifications

- **NVIDIA DLI Generative AI , ITI** (Jan 2026): Covered Python, LLMs, and RAG.
- **Certified Mobile App Developer, NTI:** Intensive track completed with 94% score.
- Various Advanced Mobile Development courses on Udemy and YouTube.

Languages

Arabic: Native | **English:** Very Good (Technical) / Good (Communication).
